**7<sup>th</sup> LUNCH IN STRASBOURG IN 2023**

**« How can Euro7 win as a solution towards cleaner transport ? »**

*The Euro 7 Regulation proposal, defines new emission standards for vehicles, parts and components and complements the legislation addressing CO2 emissions. How to ensure that Euro 7 will guarantee its pivotal role in facilitating an equitable transition to cleaner mobility while safeguarding investments in emerging industry technologies and business models? As mobility transforms, particularly in urban areas due to the electrification, regulators at all levels are actively engaged in improving air quality and in ensuring that their growing population have access to clean, reliable, and affordable transportation. The event will explore how the regulators and automotive industry can work together to find solutions in a holistic way, considering social, safety and environmental needs.*
